June 2015 Meeting Minutes

The June Meeting was cancelled.

Several Club members were at the field taking advantage of the one recent day that did not include rain and/or high winds.

Since there was no pressing business to discuss, it was decided that the members present at the field would fly until dark.

As most members are aware, North Texas and the Dallas-Ft. Worth Metro Area has received a near record amount of rain. Through the end of June, we received about 36 inches of rain. This is equal to the total average rainfall for an entire year for our area.

SEE YOU AT THE
JULY MEETING

EDITOR'S CORNER

I found some items in the JULY issue of Model Aviation Magazine that are worth the few minutes it will take to read them:

Page 6 AMA President, Bob Brown tells us that the AMA dues will be increased for the 2016 year.

Page 29 For those who are just taking the plunge into electric flight, here is an article about batteries.

Page 95 Yes, there are still a few modelers who actually cut parts from wood and assemble them into an actual flying model.

There are companies who will take a set of plans and laser cut the kit out for you, so don't be afraid of trying to do it the old way.

For some of us who were born back in the "dark ages", ordering plans from a magazine and cutting out all the parts was a real test of patience. However, it was the only game in town at the time.

Later, we were thrilled to actually be able to buy a pre-cut Kit and assemble the parts.

Keep an ARF ready to fly while you explore the world of creating your own "kit" and building it.
